

## **K-Complex Presents Science Fabric MIDI Construction Pack**

This pack contains intro, lead and bass sequences ( and sometimes more!) from current SF releases (18 tunes) in standard MIDI format for your personal enjoyment! Just import each track file into your sequencer software of choice (Cubase, Logic, Fruity- whatever floats your boat baby...), fire up your favourite synths and you're away! Feel free to re-arrange, re-mix, re-mash and generally cause musical mayhem with these files, we'd love to hear your results!

Standard MIDI files can also be loaded into any mobile phone and used as a ringtone.

Please remember that this music remains property of Science Fabric and it's artists and is licensed to you for personal use. If you'd like to use it in a commercial aspect please get in [touch](#), we'll be happy to reach an agreement.

Have Fun!

K-Complex & the Science Fabric artists - October 2007.
